Item 7. Data and standards used	
<p>(a) Data input.</p> <p>(i) Describe whether the data are reported, modelled or sourced internally or externally.</p> <p>(ii) Where the data are reported, modelled or sourced externally, please name the third party data provider.</p>	<p>Company analyses draw on a range of reliable and publicly available sources to create a transferable, equitable and auditable approach. Where possible, ECPI aims to use objective information that is easily measured and quantified and less subject to bias and opinion. In cases where an indicator is important to capture, but not easily quantifiable, ECPI process works to reduce bias, by identifying clear and unambiguous rules for assigning scores.</p> <p>Sources include:</p> <ul style="list-style-type: none"> Company annual reports Company sustainability reports, environmental reports, CSR reports or similar Company websites

	<ul style="list-style-type: none"> • Regulatory data (from the regulators in the country/countries where the company is incorporated and/or listed) • Information providers and search engines • Media and news services (including newsletters from local and international institutions and NGOs). • Screening of company's participation in international institutions • Screening of company's certifications • Screening of company's awards • Thematic websites promoted by international non-profit organizations • Company Investor Relations departments, when necessary. In such cases, we try to obtain written answers in order to be able to store them in the company's records
(b) Verification and quality of data. <i>Describe how data are verified and how the quality of those data is ensured.</i>	<p>The ECPI ESG methodology combines an academic and scientific approach to appraise and monitor a company's long-term strategic position, operational management and actual behavior when it comes to society, the environment and markets.</p> <p>ECPI analysis based on non-traditional, quantitative and qualitative non-financial indicators has the goal to develop a synthetic measure of the non-financial risk-opportunity profile of a company: the ECPI ESG Rating Assessments are based on the review of a broad range of publicly available sources including sustainability reports, annual reports and company websites.</p> <p>The ESG Evaluation covers eight categories, each one addressing a number of different aspects:</p> <ol style="list-style-type: none"> 1. Environmental Strategy and Policy 2. Environmental Management System 3. Products (industry specific) 4. Production Process (industry specific) 5. Community Relations 6. Employees 7. Markets 8. Corporate Governance <p>A company must be assessed against all the ESG categories and aspects in order to achieve the final ESG score and rating.</p> <p>Quality of the assessment is ensured by a rule-based approach, where each indicator has a multiple-choice answer with a pre-defined set of scores that can be positive or negative depending on the aspect under scrutiny, thereby reducing analyst's discretionary reading of the assessed dimension. The quality of the assessment is also insured by a two-tier validation mechanism (<i>maker-checker</i>).</p>
(c) Reference standards <i>Describe the international standards used in the benchmark methodology.</i>	<p>The rating criteria have been developed in accordance with ICCR's "Principles for Global Corporate Responsibility: Benchmarks for Measuring Business Performance" and is inspired by the principles developed by International Bodies dedicated to Responsible Investment such as UN Global Compact (www.unglobalcompact.org), the Global Reporting Initiative (www.globalreporting.org) and UN PRI (www.unpri.org).</p>
